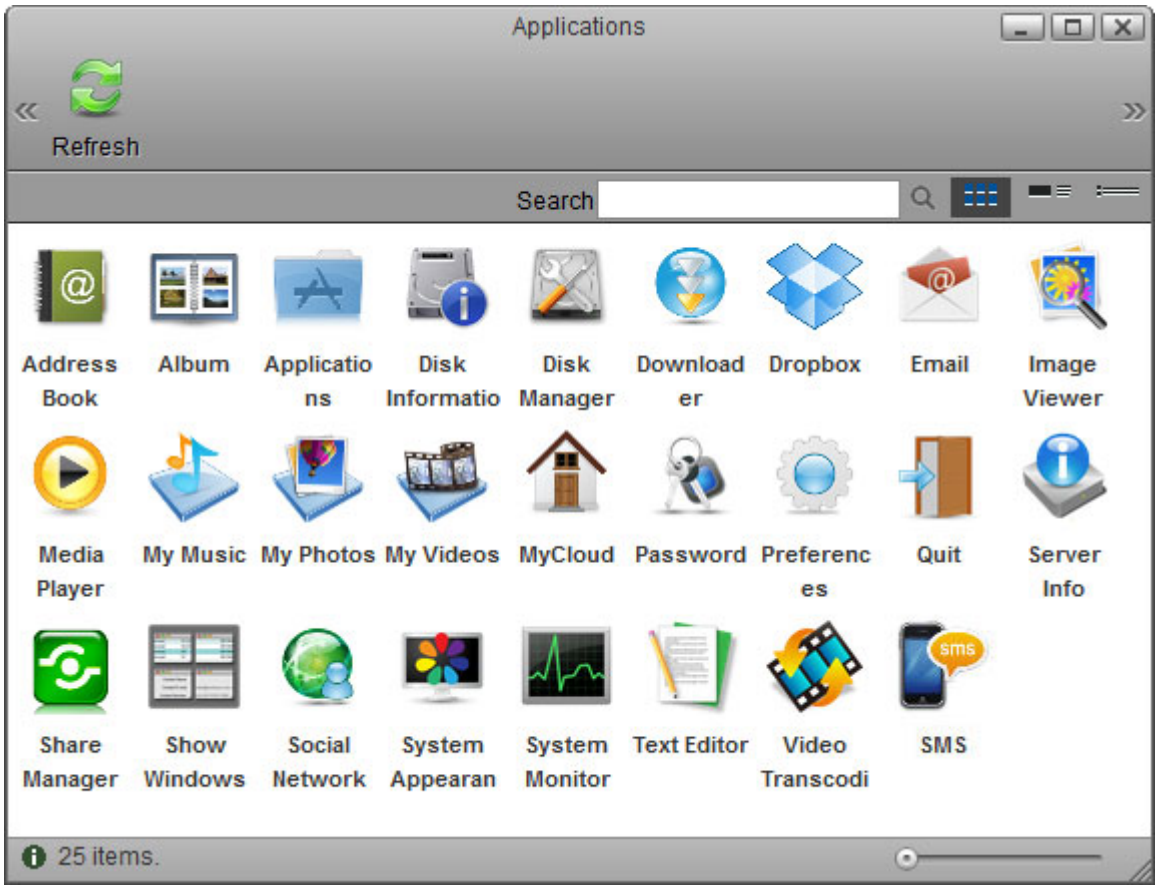
Applications

The applications folder contains all the built-in programs of the network drive and the default shortcuts to the system settings. Double-click on any icon to start the application or open the configuration window.



Double-clicking on the icon representing the “Applications” folder itself has no effect but this icon can be used to create a shortcut on your desktop or in the toolbar that points to the “Applications” folder. Simply drag and drop the icon on the desktop or the toolbar to create a shortcut.

For more details regarding the available applications, refer to the following pages:

- Address Book
- Album
- Applications
- Disk Information
- Disk Manager
- Downloader
- Dropbox
- Email
- Image Viewer
- Media Player

- My Music
- My Photos
