# Wallpaper

Replace the default wallpaper to add your personal touch. Select one of the stock images or load one of your own photos.

To keep it fresh, select a folder where you have stored your own images and then enable the slideshow function. This will cycle through your photos and load a new image at a preset interval.

Field	Description
Choose a folder	Click **Open** and select the folder where your own images are stored or click **View system wallpapers** to view the stock images. Click on your preferred image in the preview window to set a new wallpaper.

Field	Description
Position	Select how the image is displayed from the drop-down menu. • Stretch: Stretch the wallpaper to desktop size. • Center: Place the wallpaper in the center of the desktop. • Tile: Display the wallpaper as a pattern of images. • Fill: Make the wallpaper fill the desktop and cut the overflow off. • Fit: Make the wallpaper fit the desktop without overflow.
Slide Show	Enable this option and set an interval in seconds to cycle through the images in the selected folder at a preset interval.
Background Color	Select a solid color for the background and then enable the **No Image** option to hide the wallpaper image completely and use just a single color instead.
