## Firmware

The firmware for your network drive can be updated automatically or manually. Under normal circumstances, we recommend using the "Auto Update" function. You only need to use the "Manual Update" when prompted by our tech support staff to upload a specific file.

**Auto Update has been discontinued as of August 31, 2019.** If your device is not already using the latest firmware version as seen in the Change Log and you would like to update your system, please contact Tech Support at Akitio.

Please note that the web user interface is not accessible during the firmware update. If you are not able to login, the system might be in the process of updating the firmware. If that is the case, please wait a few minutes and then try again.

		Firmware		
Current Version	20121206 (It is up to	date.)		
Manual Update	Browse			
Auto Update	When Auto Upda	ite is enabled, the s	ystem will automatically	
	update the firmware	as soon as a new v	ersion is available. Plea	se
			cessible during the firm system might be updatin	
	firmware, so please	wait a few minutes a	and then try again.
