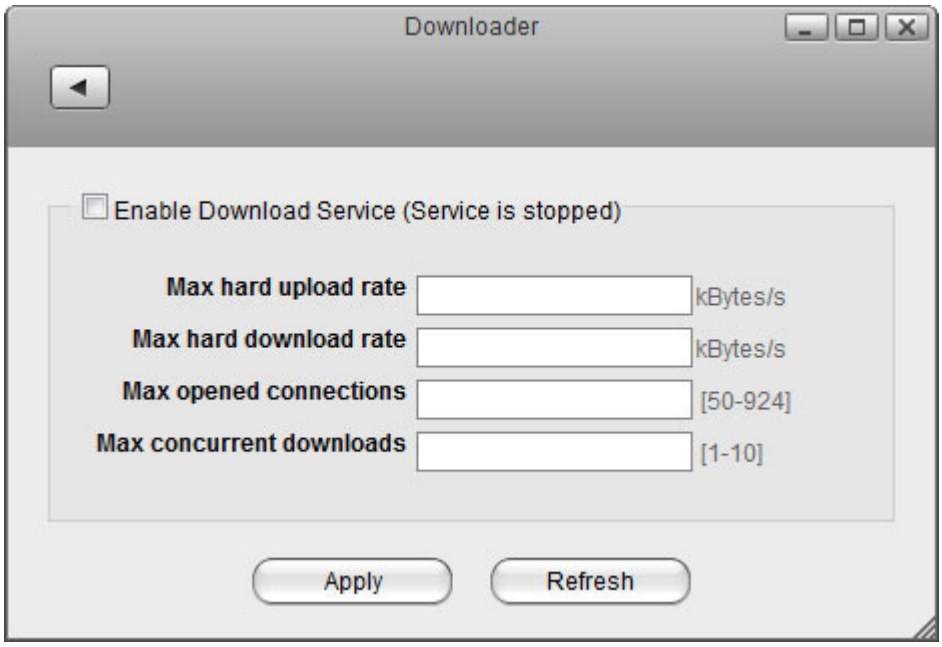
Downloader

Dowloader is an application based on MLDonkey. MLDonkey is an open source, multi-protocol, peer-to-peer file sharing application that runs as a back-end server application. MLdonkey is a Peer to peer (p2p) program that supports the following network protocols, either partially or completely:

- eDonkey network with Overnet and Kad Network
- BitTorrent
- DirectConnect
- FileTP (HTTP, FTP)



Field	Description
Enable Download Service	Select the check-box to enable the download service. The current state of the service is displayed as “Service is stopped” or “Service is running”.
Max hard upload rate	The maximum upload rate you can tolerate on your link in kB/s (0 = no limit). The limit applies to all your connections (clients and servers) and both control and data messages.
Max hard download rate	The maximum download rate you can tolerate on your link in kB/s (0 = no limit). The limit applies to all your connections (clients and servers) and both control and data messages.
Max opened connections	Maximum number of open connections.
Max concurrent downloads	The maximum number of files that are currently downloading (others will be queued).
Apply	Click **Apply** to save the changes.

For instructions about how to use the Downloader, see Applications > Downloader.

Before enabling the download service, make sure that you have a hard drive setup and

mounted as “HOME”. Otherwise, the system will not have enough room to store the temporary files during the download.
